

# OBERWERK

High-Performance Binoculars for Earth and Sky

- 6.5x32 LW -

With an ultra-wide IPD range of 51-74mm, the 6.5x32 LW can be used by 3-year-olds, as well as adults

This binocular is unique in 10 different ways! The 6.5x32 LW is the smallest, lightest, and least-expensive Oberwerk binocular. It has the widest IPD (inter-pupillary distance) range (51-74mm) in the Oberwerk product line, and the lowest magnification- which makes it the steadiest when hand-held, and also gives it a huge 8° field of view. Image quality is impressive, especially so considering the low cost. It's the only binocular in the LW Series that is waterproof and nitrogen-filled, has twist-up eyecups and captive objective covers- and it's the only Oberwerk binocular that's brown!

All of these qualities make it **the perfect binocular for children**- but adults love it too! It is ideal for any and all outdoor activities including bird-watching, hunting, sporting events, boating, and astronomy.

Just like our more-expensive models, it has fully broadband multi-coated all-glass lenses and BAK4 prisms, and a rubber-armored aluminum body. Includes a right ocular diopter, soft rubber ocular cover, captive soft rubber objective covers, rugged nylon case, and a strap.

Model	6.5x32 LW
FOV	8.0°
Eye Relief	19mm
Exit Pupil	4.65mm
IPD Range	51-74mm
Minimum. focus	3m
Dimensions	L=5", W=6", H=2"
Weight	1.07 lbs.
