

OBERWERK

High-Performance Binoculars for Earth and Sky

- 7x50C Ultra -

The Ultra Series are Oberwerk's highest-quality mid-size binoculars, with very rugged mil-spec construction (completely waterproof and nitrogen filled). The 7x50C has a built-in compass, which reads heading in degrees at the bottom of the left-side image. Because the compass is illuminated by ambient light (no batteries), it's never too dim or too bright. It also has horizontal and vertical reticle markings in mils, for calculating distance to objects or for artillery spotting, making it ideal for boating, hunting, and military usage. The relatively-low 7x magnification makes it very stable when hand-held, or when viewing from a moving boat or vehicle. Like all Ultras, it has precise individual focus. This model also

has a huge 'depth of field'- meaning when focused for 50 yards or further, everything- even objects many miles away, will be in sharp focus across the entire field of view. Like all Oberwerk binoculars, it's FBBMC (fully broadband multi-coated), for maximum light transmission and image contrast. The gray and black rubber armor is not only attractive, it's also "grippy". Includes a heavy-duty padded case and neck strap.

Model	7x50C Ultra
FOV	7.5°
Eye Relief	18mm
Exit Pupil	7.14mm
IPD Range	57-75mm
Minimum. focus	10m
Dimensions	L=7", W=8", H=3"
Weight	3.25 lbs.
