

Scanning the woods with the 15x70 LW on the Oberwerk Series 2000 Monopod

The LW (Light-Weight) Series binoculars offers genuine Oberwerk quality at a budget-friendly price. Just like the more-expensive Oberwerk models, these are fully broadband multi-coated, have highest-quality BAK4 prisms, all-glass lenses, and rubber-armored metal bodies with a brass 1/4-20 tripod adapter socket.

Available in 5 different objective sizes from 32mm to 80mm, and in a range of magnifications from 6.5x to 20x. They're ideal for amateur astronomy,

as well as any type of terrestrial viewing. All feature long eye relief eyepieces with fold-down rubber eyecups, so they can be used while wearing eyeglasses.

The 6.5x32 LW has an ultra-wide IPD range, and can be used by very young children, as well as adults.

All models include objective and ocular caps, 1" premium strap, and a rugged nylon case. The 20x80 LW includes a hard case.
