

Oberwerk SE (Special Edition) Series are our finest hand-holdable Porro-style binoculars. Available in your choice of 8x32, 10x42, and 12x50, all SE's feature ED (Extra-low Dispersion) objectives, which completely eliminate chromatic aberration (false color fringing), and provide perfect color rendition. They have a wide 65° AFOV, with excellent sharpness to the edge of the FOV, making them ideal for bird-watching, hunting, surveillance, as well as astronomy. All air-to-glass surfaces are fully broadband multi-coated to decrease light loss due to

scattering and reflections. The Oberwerk SE Series binoculars feature an ergonomic design, with green rubber-armed metal construction. They're waterproof and nitrogen-filled, with BAK4 prisms with shockproof mountings, an extra-rigid and precise center-focuser with right ocular diopter adjustment, twist-up eyecups, and brass 1/4-20 tripod adapter socket. Also includes a tough rip-stop nylon padded case and our premium strap.
