

Viewing from Berthoud Pass (11,370 ft. elevation) at the Continental Divide in the Colorado Rockies with the 8x42 Sport HD

The Oberwerk Sport HD II (High Definition) Series include; 8x32, 8x42, 10x42 binocular, as well as a 8x32 and 10x32 monocular.

They feature ED (Extra-low Dispersion) objectives, which completely eliminate chromatic aberration (false color fringing), for perfect color rendition. Oberwerk's signature broadband multi-coatings are

found on every air-to-glass surface (fully multi-coated), and the roof prisms are phase-coated for highest-possible image quality.

The eyecups are continuously

adjustable- simply twist to move them in or out. Don't worry about getting them wet- they are completely waterproof and nitrogen-filled.

The HD II models are among the lowest-priced ED binoculars (and monoculars) on the market, making them a great value for those on a budget! They're perfect for bird-watching, hunting, nautical usage, and sporting events.

The HD II monoculars are lightweight and easy to carry. They fit in the palm of your hand, making them less conspicuous than a binocular- ideal for theaters and concerts.
