

BT-100-45

Scanning Florida's East Bay with the Oberwerk BT-100-45 in "Big Eyes" Gray on TR3 hardwood tripod in Slate Gray

The highly-acclaimed Oberwerk BT-100-45, the world's most powerful binocular, features 45° viewing and a strong and smooth fork mount, which together provide comfortable astronomical viewing from horizon to zenith. Of course the BT-100-45 features Oberwerk's signature broadband multi-coatings on every lens surface, including the triplet objectives and massive Abbe-Porro and half-penta prisms. In fact the optical glass in the BT-100-45 totals 7 pounds!

25x wide-angle 65° AFOV eyepieces are included, but because of the industry-standard 1.25" helical focusers, your favorite telescope eyepieces can be used as well. The optical train is based on the same proven design as the original 25/40x100 Long-Range Observation Binocular.

For using both eyes to view the wonders of the night sky, or to watch whales from an ocean-front home- there simply is no finer instrument than the BT-100-45.

The BT-100-45 is available in your choice of a lustrous "Luna Pearl" White or "Big Eyes" Gray. Complete package includes binocular, 7x50 finder-scope, aluminum carrying case, American-made TR3 hardwood tripod with fork mount, and 25x oculars. The tripod is available in your choice of hardwoods (pecan, maple, and walnut) in four finish colors.

| Model | BT-100-45 |
|--------------|----------------|
| Objectives | 100mm triplet |
| Focal Length | 600mm |
| IPD Range | 58-79mm |
| Dimensions | L=24", W=10" |
| Weight | 28 lbs. |
| Warranty | 3 year limited |

Because accurate collimation is critical at higher magnifications, every Oberwerk binocular is tuned to perfection prior to shipping- so even at the upper limit of magnification (75x recommended), you'll enjoy perfectly-merged images.
