

BT-100XL-ED

Viewing toward Cedar Point from the Lake Erie Shoreline with the BT-100XL-ED in "Luna Pearl" White on TR3 walnut tripod

The BT-100XL-ED is the pinnacle of Oberwerk optical technology, achieving superior image quality with a 100mm binocular telescope that weighs a mere 12.5 lbs! With 100mm ED objectives, 24mm of clear prism aperture, and a lightweight magnesium alloy body, this binocular telescope sets a new standard for image quality AND portability. A binocular of this quality deserves great eyepieces, so we include our finest 70° AFOV 14mm (40x) eyepieces. Because of the industry-standard 1.25" helical focusers, your favorite telescope eyepieces can be used as well. With the widest IPD range of any binocular on the market, even small children can view through both eyepieces. Other features include a Picatinny rail handle (for mounting a wide variety of finders or laser pointers) and extendable glare shields. Not only are the XL Series the highest-quality binocular telescopes at anywhere near their relatively-low prices, they are also quite attractive! Available in your choice of a speckle-finish "Big Eyes" Gray or a lustrous "Luna Pearl" White, both featuring red-anodized trim.

Our new heavy-duty aluminum-frame case is included. Recommended mounts include the Oberwerk 5000 tripod/head, or the Oberwerk TR3 hardwood tripod with carbon-fiber elevator and Oberwerk 5000 or Manfrotto NitroTech head.

Oberwerk BT-100XL-ED in "Big Eyes" Gray with MRF (multi-reticle finder) and green laser pointer on Manfrotto Nitrotech head
