

Viewing Pittsburgh from Mt. Washington with the BT-82XL-ED in "Luna Pearl" White on TR3 walnut tripod

The XL Series is the pinnacle of Oberwerk binocular telescope technology, achieving excellent image quality in a binocular that weighs a mere 10.5 lbs! With 82mm objectives (available in your choice of ED or non-ED), 24mm of clear prism aperture, and a lightweight magnesium body, this binocular telescope sets a new standard for excellent image quality AND portability. A binocular of this quality deserves great eyepieces, so we include our finest 70° AFOV 17mm (32x) eyepieces. Because of the industry-standard 1.25" helical focusers, your favorite telescope eyepieces can be used as well. Other features include a Picatinny rail handle (for mounting a wide variety of finders or laser pointers) and extendable glare shields. Not only are the XL Series the highest-quality binocular telescopes at anywhere near their relatively-low prices, they are also quite attractive! Both models are available in your choice of a speckle-finish "Big Eyes" Gray or a lustrous "Luna Pearl" White, with red-anodized trim on the XL-ED and black-anodized trim on the XL.

Our new heavy-duty aluminum-frame case is included. Recommended mounts include the Oberwerk 5000 tripod/head, or the Oberwerk TR3 hardwood tripod with carbon-fiber elevator and Oberwerk 5000 head. Every Oberwerk binocular is tuned to perfection- so even at extreme magnifications, you'll enjoy perfectly merged images.
