

Spotting wildlife with the Oberwerk 25x100 CF Deluxe on the Oberwerk 5000 Series Tripod/Head

The Oberwerk Deluxe Series includes the 10x50, 15x70, 20x80mm, and the 25x100mm CF, all with convenient center-focus, and the 25x100mm IF, which has precise individual focus. These binoculars offer serious light-gathering power, with excellent image quality- for a surprisingly-affordable price. They are ideal for amateur astronomy, as well as long-range terrestrial viewing. The relatively-compact 20x80 Deluxe III also has a triplet objective design, which limits the chromatic aberration that would normally be present in such a short focal length instrument. Of course they are all fully broadband multi-coated, waterproof, and nitrogen-filled. The Deluxe Series binoculars feature very rugged construction, with a rubber-armored metal body. The 80mm and 100mm models have a built-in mount, which bridges the body hinge to the objective hinge. This objective hinge helps to maintain collimation (alignment) if the binocular is subjected to bumps and impacts. The built-in mount connects directly to a tripod head without adapters. Includes objective and ocular caps, and our new Heavy-Duty aluminum-frame case, except for the 10x50, which comes in a rugged soft case.

Model	10x50 Deluxe	15x70 Deluxe	20x80 Deluxe III	25x100 IF & CF Deluxe
