

BT-100-45 Binocular Telescope

Scanning Florida's East Bay with the Oberwerk BT-100-45 in "Big Eyes" Gray on TR3 hardwood tripod in Slate Gray

The highly-acclaimed Oberwerk BT-100-45m the world's most powerful binocular, features 45° viewing and a strong and smooth fork mount, which together provide comfortable astronomical viewing from horizon to zenith. Of course the new 45° 100mm Binocular Telescope also has Oberwerk's signature broadband multi-coatings on every lens surface, including the triplet objectives and massive Porro prisms. 25x wide-angle 65° AFOV eyepieces are included, but because of the industry-standard 1.25" helical focusers, your favorite telescope eyepieces can be used as well. The optical train is based on the same proven design as the original 25/40x100 Long-Range Observation Binocular.

The BT-100-45 is available in your choice of Arctic White, "Big Eyes" Gray, or Champagne. Complete package includes binocular, 7x50 finder-scope, aluminum carrying case, American-made TR3 hardwood tripod with fork mount, and 25x oculars. The tripod is available in your choice of hardwoods and finish colors. Because accurate collimation is critical at higher magnifications, every Oberwerk binocular is collimated prior to shipping—so even at 75x, you'll enjoy perfectly merged images.

3-year Limited Warranty.
