

OBERWERK

25/40x100 Long-Range Observation Binocular

See what you've been missing-
with the World's Most Powerful Binoculars!

Our 25/40x100 Long-Range Observation Binocular, deployed around the world by the US Government, United Nations Security Forces, and the US Border Patrol, is now available for your home-with-a-view. Mounted on one of our gorgeous made-in-the-USA hardwood tripods, it's as stunning to look at as it is to look through.

Oberwerk 25/40x100 Long-Range Observation Binocular in Arctic White on TR3 walnut hardwood tripod views the Pensacola Beach Pier

The 25/40x100 Long-Range Observation Binocular is a modernized version of our "Classic Edition", but is optically the very same binocular that we provide to the US Government and UN Security Forces- minus the range-finding reticles.

This model is available in your choice of Arctic White, "Big Eyes" Gray, or original Champagne, and is equipped with a 7x50 finder-scope. Rotating ocular turrets allow wide-angle viewing at 25x, and high-power viewing at 40x. Apparent field of view is a very wide 67°. True giants, they are two feet in length and weigh over 26 lbs! For decades, this Carl Zeiss-designed binocular was available only to the East German and Chinese militaries, but is now produced in partnership with Oberwerk, using the latest optical technology, for the civilian market. This is the ultimate binocular for terrestrial observation. If you've got a home with a view, enjoy it to the utmost with this magnificent instrument.

Comes complete with our gorgeous American-made TR3 tripod, in Pecan Poplar, Slate Gray Poplar, Light Honey Maple, and dark and rich walnut. The TR3 tripod can also be custom laser-engraved.

3-year Limited Warranty.
