

Sport ED Series

Viewing from the top of Perry's Victory and International Peace Memorial in Put-in-Bay, Ohio with the 10x42 Sport ED

The Sport ED Series are our finest roof-prism binoculars. ED objectives eliminate chromatic aberration for flawless color rendition and prisms are phase-coated for highest-possible image quality. The Sport ED is available in either 8x42 (8.1° FOV) or 10x42 (6.5° FOV). Despite the very wide 65° AFOV (apparent field of view), they are sharp to the edge of the field of view. The internal focuser can focus as close as just 6 ft.! Sport ED models feature magnesium-alloy construction with attractive dark green rubber armor and red-anodized aluminum accents (these red-anodized components are typically plastic on competitor's binoculars). With all these qualities, they're the perfect choice for advanced-level bird-watching and wildlife viewing, or for any type of viewing where flawless color rendition is necessary
