

Viewing from the top of Perry's Victory and International Peace Memorial in Put-in-Bay with the 10x42 Sport ED

The Sport ED Series includes our finest roof-prism binoculars and spotting scopes. ED objectives eliminate chromatic aberration for flawless color rendition. Phase-coated prisms for highest-possible image quality. The binoculars are available in either 8x42 (8.1° FOV) or 10x42 (6.5° FOV). Despite the very wide 65° AFOV (apparent field of view), they are sharp to the edge of the field of view. Internal focuser focuses down to just 6 ft.! The scopes include a 15-45x65 and slightly larger and more powerful 20-60x82. All-Sport ED models feature magnesium/aluminum construction with attractive dark green rubber armor and red-anodized accents. With all these qualities, they're the perfect choice for advanced-level bird-watching and wildlife viewing, or for any type of viewing where flawless color rendition is necessary
