

# OBERWERK

*High-Performance Optics for Earth & Sky*

Dear Oberwerk Customer,

Thanks for purchasing Seymour Solar Filters for your Oberwerk binocular. You'll notice on the Seymour documentation a reference to nylon thumbscrews. Before we carried Seymour filters, we sold Thousand Oaks filters. Thousand Oaks uses felt instead of thumbscrews to friction-fit the filter cells to the objectives. We like the better performance and lower price of the Seymour filters, but we much prefer felt-lined cells to cells with thumbscrews, therefore we omit the thumbscrews and instead line the cells with felt custom-cut for your binocular model "Thousand Oaks-style", and do so at no additional charge. We feel this insures a more consistent and secure fit than relying on thumbscrews, which could scratch the binocular's finish. Enjoy viewing the sun!
