## OBERWERK-USA Model TR3 Wood Tripod

### Featuring *SLIP-STOP* crash prevention

If you understand the difference between Fender's American-made guitars and their low-cost imported models, you'll understand why we're building these tripods in Dayton, Ohio\*.

Using select American hardwoods, these are the finest and most beautiful wood tripods on the market.

All hardware, including the adjustable spreader, is aluminum (no plastic), either black powder-coated or anodized. The legs are laser-engraved with a length scale in 1/8" increments, for precise height adjustment.

These tripods feature a unique safety feature called *SLIP-STOP* (patent-pending). If a leg clamp slips from wood shrinkage due to a drop in humidity, the leg will re-tighten after about 2 inches of slippage. This could prevent an accidental toppling of the tripod, and a catastrophic crash of your expensive optics.

Specifically-designed to support Oberwerk's Long-Range Observation Binoculars and BT Series Binocular Telescopes, but available in a variety of configurations and options to support any binocular, telescope, or large-format camera (up to 40 lbs.).

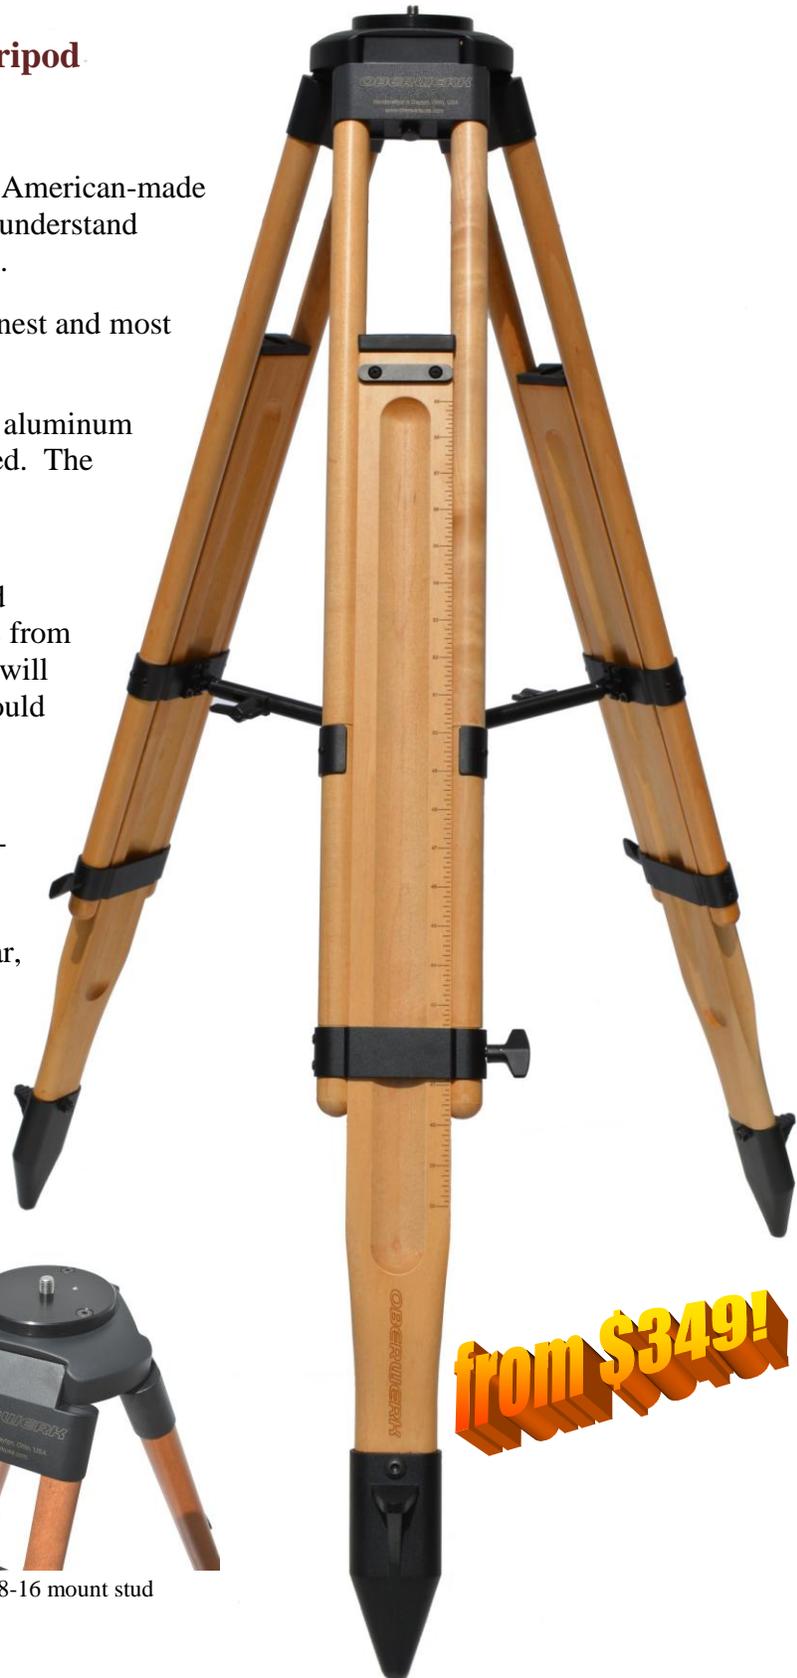

Your choice of medium-finish poplar, golden hard maple (shown at right), and rich dark walnut.

All-metal adjustable spreader

Standard 3/8-16 mount stud

from \$349!

\* some components imported

Oberwerk Corporation, 1861 Wayne Ave., Dayton, OH 45410, USA

## Oberwerk-USA TR3 Tripods, Options and Accessories

	<p><b>Series TR3-P Wood Tripod</b></p> <p>Beautiful hardwood tripods, made in Dayton, OH. Featuring <i>Slip-Stop</i> (patent-pending) anti-crash leg clamps. All the non-wood components of the tripod are aluminum (no plastic), including the adjustable spreader (which controls leg angle). Laser-engraved length scale on each leg for precise height adjustments. For use with larger binoculars, telescopes, and large-format cameras up to 40 lbs. Solid CNC-milled American poplar, with medium brown finish.</p>	<p>\$349.95</p>
	<p><b>Series TR3-M Wood Tripod</b></p> <p>As above, but in hard maple, with light finish.</p>	<p>\$399.95</p>
	<p><b>Series TR3-W Wood Tripod</b></p> <p>As above, but in walnut with rich dark finish.</p>	<p>\$439.95</p>
	<p><b>All Stainless-Steel Hardware Upgrade</b></p> <p>Recommended for use in near-ocean or humid environments.</p>	<p>\$25.00</p>
	<p><b>Carbon-Fiber Elevator</b></p> <p>Adds 18" of quick and easy height adjustment to the TR3 Series tripod. Strong and solid, for loads up to a maximum of 16 lbs.</p>	<p>\$85.00</p>
	<p><b>Oberwerk Eyepiece/Beverage tray</b></p> <p>Made in USA of laser-cut 1/8" aluminum., black powder-coated to match the TR3 tripod hardware. Holds up to 4 pairs of extra eyepieces. Also has two rubber-lined wine/pint glass cutouts.</p>	<p>\$50.00</p>
	<p><b>Rubber swivel feet upgrade</b></p> <p>For the TR3 Series tripod. Must be ordered with tripod.</p>	<p>\$20.00</p>
	<p><b>Oberwerk 25/40x100 Long-Range Observation Binocular Mount</b></p> <p>Azimuth bearing/mount post for mounting the 25/40x100 Long-Range Observations binocular to the TR3 tripod.</p>	<p>\$60.00</p>
	<p><b>Series 5000 Tripod Head</b></p> <p>The Oberwerk 5000 Series fluid head has a high load capacity (up to 16 lbs.), yet is exceptionally affordable compared to other high-capacity heads. All-aluminum construction, weighs just 2 lbs. Includes a quick-release plate and dual panning handles. Extra quick release plates are available for quick swapping of other devices (cameras, spotting scopes, etc.). Add this to the TR3 tripod and you've got the perfect mount for our larger binoculars, up to the 16 lb. 110mm Ultra Series binoculars.</p>	<p>\$120.00</p>
	<p><b>Series 5000 Extra Quick-Release Plate</b></p>	<p>\$10.00</p>
	<p><b>Manfrotto 181B Auto-Dolly</b></p> <p>Add easy mobility to the TR3 Series tripod. Heavy-duty, handles up to 45 lbs. It's called the "auto dolly" because a single foot pedal instantly raises/lowers wheels.</p>	<p>\$345.00</p>
